

Appl. No. 10/699,617
Amdt. dated March 15, 2005
Reply to Office action of December 15, 2004

In the specification:

Page 15, lines 2-6, please amend the paragraph as follows:

A digital toner/locator employs tone packets using a 455Khz carrier. Plural packet quanta provide multiple test modes which are advantageously selected from a probe without requiring returning to the tone generator to change mode. A locate and isolate mode are provided, as well as multiple song selection, for choice of alternative songs played by the detector when the tone packets are detected.
